

# INPATIENT PHYSIATRIST

New England Rehabilitation Hospital of Portland (NERHP), a 90-bed acute rehabilitation hospital specializing in treating stroke, orthopedic, brain injury, amputee, spinal cord injury, multi-trauma, neurologic and cardiopulmonary patients, seeks a PM&R physician to join our attending staff. Interest in SCI/TBI preferred. Our referral sources are well-established; NERHP maintains a consistent census, averaging 80-90% occupancy and volumes of more than 1600 inpatients per year.

The greater Portland area offers an excellent quality of life for people of all ages. Just two hours from Boston, Portland is on the Maine "Vacationland" corridor on the southern coast of Maine just minutes from miles of sandy beaches and a short drive to spectacular mountains. In addition to being a scenic working fishing harbor, this is also Maine's cultural center featuring music of all genres, the Portland Symphony Orchestra, boating, nightlife, shopping, fine dining and educational opportunities.
